TEXAS BUSINESS LEADERS ON EDUCATION REFORM

SURVEY REPORT: Q3 2018

BUSINESSFORWARD
EXECUTIVE SUMMARY

Business Forward is a national business organization that has worked with more than 10,000 business leaders across Texas. We cover a range of issues, including education reform, tax reform, trade, infrastructure, clean energy, and immigration. We’ve organized hundreds of briefings across the country on education reform, focusing on career and technical training, promising education technologies, school choice, and charters. These briefings have included the Secretary of Education, the Secretary of Labor, two deputy secretaries, and hundreds of other officials.

Last month, we asked business leaders in Texas to tell us about the changes they believe schools should make to better prepare students for the workforce. We asked them about funding, standards, teacher autonomy, accountability, and technical training.

As expected, half of the responses focused on skills, including technical training (from software coding to wood shop) and life skills (like balancing a checkbook).

Six in 10 responses focused on fixing how schools teach, from offering more personalized teaching and smaller classes, to focusing on basic skills and critical thinking.

One in four responses covered social issues, such as bullying and discipline, work ethic, morality, and “liberal indoctrination.”

One in five responses covered school management, including more funding, equitable funding for charters, and giving teachers more control over their classrooms.

One in six responses criticized the State of Texas Assessments of Academic Readiness (STAAR) for distracting from more productive learning.

Respondents are pro-teacher and anti-bureaucrat. Complaints were more likely to focus on the education system than those working within it. While some were critical of teachers, respondents who mentioned teachers were more likely to support giving them more autonomy.
We have worked with more than 10,000 business leaders across Texas, and more than 1,000 of them have participated in programming on how to improve public schools. Last month, we asked Texas business leaders to tell us about the changes they believe schools should make to better prepare students for the workforce. More than 100 of them provided statements.

As expected, half of the responses focused on skills. One in four responses recommended that schools provide more technical training, from software coding to wood shop. One in four respondents focused on life skills, like balancing a checkbook or applying for a job. Several responses focused on providing better support for students going directly into the workforce (instead of college).

One in six responses criticized the State of Texas Assessments of Academic Readiness (STAAR) for distracting from more productive learning.
One in four responses recommended that schools provide more technical training, from software coding to wood shop.

I believe Texas is making some positive strides in preparing our students, but there are gaps. There are specific trade schools that prepare students in specific skills if they choose not to go to a traditional school.

Regular local schools do not provide enough preparation for students for the workforce or college. Whereas, charter schools offer not only skills and some technical training, but preparation for the workforce or further education.

No vocational training at all.

- CATHY CARROLL
CLYDE, TX

We need more opportunities to partner with school systems... apprenticeship or internship programs for meaningful on-site learning.

- JESSICA ATTAS
VICE PRESIDENT OF PUBLIC POLICY,
GREATER WACO CHAMBER OF COMMERCE
WACO, TX

Only a handful of public schools have fully embraced trades as viable career paths. The focus on college preparedness continues to create a disconnect between school career counselors and local business owners’ needs.

- JENNIFER PEREZ
MARKETING/COMMUNICATIONS
EL PASO, TX

We need more opportunities to partner with school systems... apprenticeship or internship programs for meaningful on-site learning.

Students need to be immersed in a well-rounded environment, to include home economics, business courses, consideration of others, training, woodshop, etc.

- SHERRIE HARVEY
SAN ANTONIO, TX

In high school, they learn nothing beneficial for their lives, learning how to have a banking account...look for a rental house or learn about doing bills.

- JENNIFER ESCAMILLA
PLAINVIEW, TX

I think they need to bring back home economics, and electives they don’t teach anymore. Kids are coming out of schools not knowing how to perform basic math skills like balancing a check book and such.

- CHERYL BECERRA
WICHITA FALLS, TX

Local and state businesses should be actively involved in [deciding] curriculum and assuring more than adequate funding.

- CHERYLANN CAMPBELL
OWNER AND A CONSULTANT, C2 HRSOLUTIONS LLC
AUSTIN, TX

One in four respondents focused on life skills, like balancing a checkbook or applying for a job.

LIFE SKILLS
Several responses focused on providing better support for students going directly into the workforce (instead of college).

“Local schools are not preparing kids for the workforce at all. [They are] preparing them to get into debt to go to college. Most are setting up B and C students for failure at the [college] level, instead of training them to do something they might be good at or love to get up and got to work.”

- JHONNA NIVER
HOUSTON, TX

“Schools only prepare students for college not for any trade skills. Not all students should go to college.”

- SHARON JOHNSON
ONALASKA, TX

“Put shops back in schools for free. Metal shop (welding), wood shop (construction), auto shop and cosmetology. These careers used to be free.”

- JULIE MCMURTRY
SPRING, TX

“Not enough technical coverage... Should be more fields covered. Students need to be taught by real craftsmen.”

- DALE WINDHAM
CENTER, TX

“Too many students are pushed into college that are not college material. Too many students are not groomed and given the opportunity to learn trades.”

- FRANK GROENTEMAN
FRISCO, TX

“Not all students should go to college.”

- FRANK GROENTEMAN
FRISCO, TX

SMALLER CLASSROOMS, PERSONALIZED TEACHING

Six in 10 responses focused on fixing how schools teach, from offering more personalized teaching and smaller classes, to focusing on basic skills and critical thinking.

- SHARON LYONS
  DALLAS, TX

"I have always opted to put my kids in charter schools instead of [traditional] public schools. The classrooms are smaller, and kids get one-on-one learning from the teachers."

- MARIA DAVALOS
  DALLAS, TX

"Provide more individualized attention to the students and a smaller class."

- ANITA ORTIZ
  SAN ANTONIO, TX

"Better school lunches. More after school care. Better understanding of the students."

- DEBRA KENNEDY
  TEMPLE, TX

"I think children need to learn at their own pace and be able to receive the advanced education that would benefit them and give them the chance to benefit the workforce."

- LAURA LEA BLANKS
  KILGORE, TX

"Our son needed what the local charter school specializes in: smaller classes lead by passionate people who are well compensated and who are allowed to take time for students like our child."

"Better school lunches. More after school care. Better understanding of the students."

- SHARON LYONS
  DALLAS, TX

"Provide more individualized attention to the students and a smaller class."

- ANITA ORTIZ
  SAN ANTONIO, TX
One in four responses covered social issues, such as bullying and discipline, work ethic, morality, and “liberal indoctrination.”

"In most public schools, there is no help for kids to decide what they want to do with their lives, or how to continue their lives in a responsible manner." - Sheryl Lipschitz, Mesquite, TX

"My first grader and kindergartner attend ILT charter schools. They are receiving a wonderful, multi-cultural experience learning Spanish and Chinese – and being taught the value of service, integrity, hard work, and honesty." - Juliana Champlin, Fort Worth, TX

"The public education system and their unions push liberal ideas, open sex, aggressive behavior, ‘if you want it just take it’ instead of working hard for it." - Julie McMurry, Spring, TX

"So many parents are run out of the public school system because of extreme bullying of their kids..." - Mary McCreery, Joshua, TX
I know that the charter school my daughter attends has the same economic/racial make up as the poorest performing public schools in our area, and [it] succeeds on par with the higher performing schools with different socioeconomic make up, with half the budget.

- JOEY FICKLIN
AUSTIN, TX

Only in charter schools are they coming out prepared... A child’s individual efforts are rewarded.

- WILLIAM GARRISON
HOUSTON, TX

I think that any taxpayer money should follow the student to the school picked by the parents. This should include Christian charter schools.

- LARRY BOHANNON
HOUSTON, TX

“[My daughter] will start college classes in 9th grade. It is unfortunate that [traditional] public school cannot meet her needs. As parents, we must have choice, whether for high performers, low performers, or kids who do not fit the one-size-fits-all public school model. Competition will improve our school system.

- DAVID WILCOX
LONGVIEW, TX

Hire teachers with advanced degrees and let them teach. Stop micromanaging with fixed, testing-focused preparation. Open minds, open horizons, relate to the real the world.

- BRIAN BUTLER
HOUSTON, TX

My parents ran a charter school and the kids had a higher rate of going to college than [traditional] public schools. Better education = successful citizens.

- TWILA HENDERSON
DENTON, TX

I think that any taxpayer money should follow the student to the school picked by the parents. This should include Christian charter schools.

- LARRY BOHANNON
HOUSTON, TX

My parents ran a charter school and the kids had a higher rate of going to college than [traditional] public schools. Better education = successful citizens.

DENTON, TX

One in five responses covered school management, including more funding, equitable funding for charters, and giving teachers more control over their classrooms.
STAAR

One in six responses criticized the State of Texas Assessments of Academic Readiness (STAAR) for distracting from more productive learning.

“Schools are too focused on the stupid STAAR test. They only teach them to pass the test, which stresses the poor kids out.”
- APRIL CARDENAS
SAN ANTONIO, TX

“We switched to Innovation Academy because the local school (Longview ISD) is more concerned with the STAAR test than her needs...IA is focused on learning, not tests.”
- DAVID WILCOX
LONGVIEW, TX

“They are not preparing kids adequately...I see a lack of critical thinking skills, which is what happens when you teach to pass common core testing.”
- NANCY SMITH
BRYAN, TX

“Our schools are teaching a test and not life skills.”
- KAREN KINSEY
KATY, TX

“The schools are teaching tests. They are not teaching morals, values, and integrity.”
- JULIE MCMURTRY
SPRING, TX
As part of our work on education reform, Business Forward surveyed our national network of business leaders on the state of public schools and how to improve them. The business leaders responding represented a range of industries, businesses sizes, and more than 40 states and territories. Two-thirds either have children currently enrolled in public school or have children who have graduated from public school.

A majority of these business leaders (57 percent) believe our schools are on the wrong track. One in four worries that poor schools will hurt her business’s ability to compete. Half believe our schools are underfunded. And 85 percent support one or more market-driven reforms, including greater school autonomy (59 percent), replacing underperforming schools (29 percent), and expanding charter schools (34 percent).

These results are consistent with what we’ve heard from business leaders at the hundreds of briefings we’ve organized around the country on career and technical training, promising education technologies, school choice, and charters. These briefings have included the Secretary of Education, the Secretary of Labor, two deputy secretaries, and hundreds of other officials.
