MAKING THE BUSINESS CASE

EDUCATION REFORM

TRAINING MANUAL : Q2 2020

BUSINESS FORWARD FOUNDATION
INTRODUCTION

If we want to modernize America’s schools, fix our highways, win the clean energy race, increase exports, and make health care more affordable, we need to convince undecided Americans in the middle. We should start by answering their questions about jobs, costs, economic opportunity, and government waste.

In other words, **we need to make the business case for action.**

Business Forward has helped more than 150,000 business leaders brief policymakers and work with local media, publish op-eds, testify at public hearings, lobby members of Congress and the White House, and advocate online.

They have appeared on CNN, MSNBC, CNBC, FOX News, and hundreds of local broadcast and radio stations. They’ve been featured in national outlets, like the Wall Street Journal, New York Times, Washington Post, and hundreds of local papers.

We’ve also helped business leaders submit testimony to state legislatures, EPA, DHS, House Ways and Means, Senate Finance, and the White House.

**We’re here to help you make the most of your time fighting for the issues that you care about.** This manual is intended to help you get started.
HOW TO TALK ABOUT:

EDUCATION REFORM
FOUR KEY POINTS

We’ve organized hundreds of briefings around the country on education reform and the future of work. Here are some of the most common points that business leaders make when it comes to reforming our high schools:

1. Our schools are failing.
2. Poor schools hurt the economy.
3. As work evolves, the gap between today’s workforce and good jobs grows.

THE CHALLENGE

The future of work is a road map for education reform:

• Automation can create more jobs here than it destroys.
• We know what students need: basic technical skills, the ability to learn continuously, teamwork and good judgment, and self-reliance.
• Internships and apprenticeships work.
• More college isn’t always necessary.

THE OPPORTUNITY
OUR SCHOOLS ARE FAILING.

• We are failing our kids. Only one in three 8th graders is proficient or above in math, science or reading.
• Only one in four high school seniors is “college ready” in math, science, English, and reading.
• It’s hurting their futures. 67% of all jobs in the economy require post-secondary education and training beyond high school.
• It’s worse for poor and minority students. Students from affluent families are four times more likely to earn a 4-year degree than students from poor families.
• Students of color are twice as likely to drop out of high school than white students.

POOR SCHOOLS HURT OUR ECONOMY.

• We’re falling behind as a nation. Despite ranking 2nd in per pupil spending for K-12 among OECD countries, the U.S. ranks 13th in reading, 37th in math, and 18th in science.
• If we can’t fill jobs here, they’ll move overseas. STEM jobs are growing six times faster than non-STEM jobs. Today, employers have 3 million STEM jobs they cannot fill.

AS WORK EVOLVES, THE GAP BETWEEN TODAY’S WORKFORCE AND GOOD JOBS GROWS.

• Work is changing in the U.S. There are 3X more robots now than there were 20 years ago. There will be 9X more in 2030 than today. Workers will need to work alongside these robots moving forward.
• The average American will have at least 12 different jobs between the ages of 18-50.
• 85% of jobs that today’s learners will be doing in 2030 don’t exist yet.
• New jobs require new skills. 40% of Americans are in occupational categories that could shrink by 2030. 54% of U.S. workers need reskilling. The length of training ranges from a few weeks to more than one year.
• 99% of jobs created during the economic recovery went to workers with postsecondary education or training.
• By 2030, workplace demand will increase by 60% for technological skills, 40% for creativity, and 33% for entrepreneurship.
• We’re behind on worker training. We spend less on worker training (as a % of GDP) than Denmark, France, Germany, Belgium, Spain, and Canada.
• 2.4 million manufacturing jobs are at stake. Persistent skills shortages could cost the U.S. $85 billion this year, and could risk $2.5 trillion in economic output over the next decade.
• Automation impacts workers, regions, and industries differently, which ultimately increases inequality. 60% of U.S. job growth through 2030 will likely be concentrated in 25 urban counties, while rural areas lose jobs.
• 11.9 million Hispanics and African Americans are projected to be displaced by automation by 2030.
THE FUTURE OF WORK IS A ROAD MAP FOR SCHOOL REFORM

STEP ONE: TECHNICAL AND DIGITAL SKILLS

Seven million job openings in 2015 were in occupations that required coding skills. But only 35% of U.S. high schools offer computer science classes.

Programming jobs overall are growing 12% faster than the market average.

By increasing computer science and other STEM course work, we can help graduates succeed at work—and many of them can do so without college.

STEP TWO: CONTINUOUS LEARNING

The kinds of technical skills workers need are continuously evolving, so being able to learn quickly is essential.

Most jobs will not be automated out of existence, instead they will integrate new technologies to expedite existing processes, meaning workers need to quickly learn and adapt to new systems, softwares, and machineries.

They also need the ability to understand the engagement, interaction, and collaboration between humans and machines.

STEP THREE: TEAMWORK AND JUDGMENT

As automation eliminates simple tasks, it increases the value of “human” skills that robots and A.I. cannot handle:

- Critical thinking and problem solving
- Creativity
- Social and emotional skills
- Empathy
- Enthusiasm for learning
- Ability to embrace change and uncertainty

STEP FOUR: SELF-RELIANCE

Less than 13% of Americans have pensions. 25 years ago, that figure was 38%.

Today’s young workers need to prepare for retirement.

Seven million job openings in 2015 were in occupations that required coding skills. But only 35% of U.S. high schools offer computer science classes.

Programming jobs overall are growing 12% faster than the market average.

By increasing computer science and other STEM course work, we can help graduates succeed at work—and many of them can do so without college.

WHAT YOU NEED TO KNOW IF YOU’RE A BUSINESS LEADER TALKING ABOUT EDUCATION REFORM

IT’S EASY TO MAKE AN IMPACT – JUST SHOW UP.
School board meetings and hearings don’t attract big crowds, but these forums give business leaders an opportunity to contribute to the conversations happening around education reform.

BUSINESS LEADERS ARE AMONG THE MOST TRUSTED EXPERTS IN THE ROOM WHEN IT COMES TO K-12 EDUCATION.
Although K-12 education is about much more than getting a job, most parents, administrators, and board members will listen carefully to what local employers have to say about how high schools can prepare their students for the workforce.

EDUCATION REFORM CAN BE A CONTENTIOUS ISSUE.
Discussing the impact of charter schools and teachers unions on education can be polarizing, and arguments tend to get emotional. We recommend focusing on what business leaders know: the skills they need in new hires.
8 RULES TO FOLLOW
1: MAKE THE BUSINESS CASE

You have a business to run, so you want the time you volunteer to be meaningful and efficient. We focus on the business case for three reasons.

1. The questions undecided Americans are asking tend to relate to jobs, taxes, economic opportunity, and government waste. And they trust business leaders more than politicians.

   "I’m happy with the health insurance I get through work. What does repealing the Affordable Care Act mean for me?"

   "I want to do something about climate change. Can we afford it?"

2. Undecided Americans understand most public policy decisions create winners and losers. They want to know how a particular bill or issue will affect their industry, their town, and their employer. A business leader can explain the connection between national issues and her local economy in ways that matter.

   "I’m a home builder: here’s what the Republican tax plan means for businesses like mine here in Ohio."

   "I manage farms in Utah and California: here’s what climate change is doing to my crops – and what it means for American agricultural jobs and exports."

3. A data-driven, results-oriented approach helps depoliticize contentious issues. Consider these examples:

   • A software executive encourages his school board to support a new charter school specializing in IT and software coding, arguing that he’ll have to hire from out of town if local schools can’t produce qualified graduates.

   • Automakers and suppliers explain to climate change deniers in Congress how severe weather caused by climate change is affecting auto supply chains and assembly plants – causing plant shutdowns that cost $1.2 million/hour.
Business leaders generally contribute to the debate in one of three ways. Before you speak out, be sure to understand which role you’re playing.

1. Raising awareness about a problem.

For example, to push education reform, a business leader can explain the long-term cost of failing to modernize her city’s schools. She can demonstrate the problem is real; solutions make sense; and gridlock is expensive.

“I need to hire 20 software engineers over the next three years. And I really want to hire local, but our local schools aren’t producing enough engineers.”

2. Pushing specific provisions or concepts during a legislative process or budget negotiation.

For example, a business leader can use negotiations over corporate tax cuts to make the case for a carbon tax that would encourage clean energy and pay for new infrastructure investment.

“If we want to cut corporate tax rates and at the same time spend more on infrastructure and defense, we need to consider a carbon tax to provide more revenue. It will also reduce carbon emissions and help America win the clean energy race.”

3. Helping close a deal, supporting a tough vote.

Today, it’s too easy for special interests to derail needed reforms. Even allies can block a “good” deal because it’s not “perfect.”

For example, a business leader can explain why “weak” environmental provisions in a trade deal are better than the alternative: no environmental protections, at all.

“You may be right that the environmental protections in President Obama’s Trans-Pacific Partnership don’t go far enough. But if this deal fails, China will step in with its own deal. And China’s deal won’t have any environmental provisions at all.”
3: HAVE A CLEAR OPINION

“On the one hand... but, on the other hand...” won’t help a Member of Congress decide how to vote, and newspapers are unlikely to publish an op-ed that fails to pick a side. **If you’re going to speak out, be clear.** Raise an alarm. Provide cover on a tough vote. Avoid equivocation.

JON HURDLE

CLIMATE CHECK: US INVESTORS ‘LACK DATA ON CLIMATE RISK’

...Smith Insurance Agency in Helena, Ark. has been writing fewer home-owner policies in recent years because premiums and deductibles have soared, while policyholders have avoided making claims for fear of not getting their policies renewed by risk-averse underwriters, said owner Kevin Smith.

An owner of a typical 3,000-square-foot house in Smith’s market is now paying $4,000 a year to insure the property, more than twice the rate of five years ago, while the deductible for such a property has surged to $2,000 from $500 over the same period.

Over the last two years, premiums have risen about 20%, he said, and that’s straining homeowners’ ability to maintain coverage or forcing the mot choose between insurance and other purchases.

“People are getting to the point where they can’t afford homeowners’ insurance any more,” he said. “There’s a huge cost to our customers and to our economy because it means they will have less to spend on other things.”...

To slow greenhouse gas emissions, he urged governments to impose a carbon tax, which would fall most heavily on the biggest producers - the power-generation industry - forcing it to pay a tax that is already effectively levied on all those who feel the effects of climate change.
Talking live to a radio reporter? You’ll get two questions and about 20 seconds. Taping a TV interview in your office? The station will use about 30 seconds of your 15-minute interview. Meeting with your Senator? You’ll get about five minutes.

Reporters can’t quote you if your answers are too long. Elected officials, who meet with dozens of constituents every day, won’t remember your key points if they’re buried.

To be successful, make your point quickly, and make it repeatedly. Extend your idea with examples. Ideally, start each interview with three points in mind; practice each point before you speak with the reporter or official; and practice referring back to your points in different ways.

Using local examples and simple comparisons can help you make your point more quickly. For example, in our issue brief *The Trump Slump in Tourism*, we examine the effect of Trump’s negative rhetoric and policies on the number of international visitors. The decreasing global share of U.S. tourism has led to 14 million fewer visits this year. This is the economic equivalent of closing 30 autoparts.
5: SPEAK FOR YOUR EMPLOYEES, CUSTOMERS, SUPPLIERS AND COMPETITORS

You’re most effective when you cite your employees, customers, suppliers, or competitors as evidence. For example, an accountant with 50 clients has credibility on simplifying the tax code, while an accountant with 50 employees has credibility explaining the kinds of health care options they value.

Most business leaders share the name of their company when they talk with reporters, publish an op-ed, or speak out in some other way. These executives are building their company’s brand:

"At ABC Insurance, we’ve seen rates for beach property rise by 50% over the past four years because of climate change risk. Clients are cancelling their policies, leaving themselves open to big losses."

Alternatively, you can also speak generally, without naming your company, as an expert in the industry:

"I’ve sold insurance for beach houses here in New Jersey for 30 years, and climate change is driving rates up by 50%. Clients are cancelling their policies, leaving themselves open to big losses."

Business abroad is going to happen anyway, the question is whether or not international business practices will be fair. If the United States doesn’t set the rules, someone else will.

- Brenda Hall, 360 Bridge

Every product we sell overseas helps us hire more Washington-state workers and pay them competitive wages.

- Anil Amlani, Sonosite

If passage of this authority stalls, our trading partners might be inclined to negotiate their own agreements, with the United States left on the sidelines.

- Det Ansinn, BrickSimple

Alternatively, you can also speak generally, without naming your company, as an expert in the industry:

"I’ve seen how exporting can powerfully transform a company, and I want to see it do the same for others."

- Kyle Weatherly, Solaris

Discouraging businesses from expanding to other countries is like standing in a shopkeeper’s doorway and turning away 95 percent of customers.

- Craig Shields, Graymills

The future of small businesses like mine goes hand in hand with the future of the U.S. trade agenda.

- Wendy Mascio, Medical Equipment

Pittsburgh Post-Gazette

The Philadelphia Inquirer

SMALL BUSINESS LEADERS ARGUE FOR NEW TRADE AGREEMENTS
6: REFRAME QUESTIONS ABOUT “HOT BUTTON” ISSUES

The whole point of having business leaders speak out is to get beyond the partisan or hot button issues that dominate most press coverage. Your job is to focus on what a particular proposal or problem means for business, jobs, and economic growth. That’s your area of expertise. If a reporter does ask you an off-topic question, pivot back to your key points.

EXAMPLE - IMMIGRATION REFORM

A business leader can explain the economic benefit of recent bipartisan immigration reform proposals. One key benefit of these proposals relates to how much immigrants could contribute to Social Security. A reporter may respond to your point by asking about illegal drugs or gang violence.

SUGGESTED ANSWER:

“I can’t speak to that, but I do know that immigrants could contribute nearly $300 billion in additional support for Social Security over just 10 years.”

EXAMPLE - CLEAN ENERGY

A business leader can support clean energy regulations by explaining why wind and solar prices keep dropping – and how they can help create jobs in states that have traditionally relied on imported coal, oil, and gas. A reporter may ask why the government should subsidize wind and solar over coal.

SUGGESTED ANSWER:

“Taxpayers subsidize every energy sector. In fact, we’ve spent $1 trillion on energy subsidies since WWII, and 70 percent of that went to oil, gas, and coal. I can’t speak to the value of all the money we’ve spent on coal and oil, but I do know that wind and solar are becoming more competitive, and they present my state’s first real chance to build an energy economy.”

EXAMPLE - TARIFFS

If you’re talking with a reporter about how new steel and aluminum tariffs are raising your prices and making it harder to export your products, he may ask you about the drama over President Trump’s behavior at a recent G7 Summit.

SUGGESTED ANSWER:

“I can’t speak to that, but I do know that tariffs increased my steel costs by 25%, which is making it hard to export my goods to Europe and Asia. In those markets, the price they pay for steel prices has actually dropped.”
7: ACT LIKE YOU’RE ON-THE-RECORD, EVEN WHEN YOU’RE NOT

The rules for “on” and “off” the record can vary from reporter to reporter. As a general rule, we recommend you operate on-the-record – and pick your words accordingly.

**ON-THE-RECORD:**
The reporter can quote you directly (by name).

**OFF-THE-RECORD:**
Off-the-record can mean different things. It usually means the reporter can only use information if a second source verifies or shares it. Sometimes, it relates to how you are cited. For example, a reporter may refer to you indirectly (for example, as “a partner at a Cleveland VC firm”), or she may use your information without citing you at all. Some reporters consider this method of citing individuals “on background.” On background can also mean you are willing to share research or other information with a reporter but do not want to be featured in the story.

Because reporters apply these rules differently, you need to set the terms of the conversation before the interview begins. If you do not specify “off,” you are “on.” If you specify “off,” and the reporter says nothing, you are still “on.” If you do not want to be quoted, establish the terms under which the reporter may use the information and how it will be attributed.

**REMEMBER:** YOU CAN’T TAKE SOMETHING OFF THE RECORD AFTER THE FACT.
A single business leader, acting alone, is unlikely to have an impact. But hundreds or thousands of business leaders, making similar arguments at the same time, are hard to ignore.

It also helps to deliver your op-ed, interview, or post when your particular issue is in play. We had a handful of opportunities to resolve the DACA/Dreamers crisis last year. Each opportunity was driven by the budget process, or some other legislative priority. Each time, immigration advocates and Business Forward worked together to deliver business support for a reasonable compromise that would protect Dreamers and respect the rule of law.

We encourage you to share your work with us, and we promise to limit our “digital actions,” surveys, and “a reporter just called” requests to moments when you can really make a difference. We won’t waste your time.

With your permission, we can also include your comments in testimony we present to Congressional committees and federal agencies.
ABOUT BUSINESS FORWARD FOUNDATION

The Business Forward Foundation is an independent research organization that takes a business-minded look at policy issues affecting America’s economic competitiveness. The Foundation combines insights and advice from more than 100,000 local business leaders across the country with rigorous policy analysis to educate the general public on some of the most important issues of our time.
